CLOUD HOSTING SOLUTIONS

Enertia Software offers infrastructure frameworks that provide auxiliary functionality needed to compete in today's business landscape. These include fully integrated web (or cloud) based interfaces:

Fully Integrated Hosting Solutions:

Upstream energy companies need flexible implementation solutions that support business expansion, agility, and operational efficiency.

The ability to outsource IT services through cloud-hosting provide alternative accessibility and cost-saving solutions for upstream oil and gas operators.

Enertia is the only cloud option offering a fully integrated and single database ERP solution exclusively for the upstream oil and gas industry. Enertia provides hosting, management, and IT support, through a secure environment, for the industry's leading interactive data-driven application.

Under our infrastructure framework, Enertia provides the network, hardware, IT services and leading edge software to maintain your integrated data.

HOSTING ADVANTAGES:

- Web access to Enertia's fully integrated industry leading ERP system

- Streamline data analysis

- Enhance workflow processes

- Increase efficiencies for improved business intelligence

- Reduce IT hardware maintenance & expenditures

- Supported IT services

- Secure hosted environment
